Career Objective

Highly motivated Computer Science undergraduate with a 8.91 CGPA and a strong foundation in full-stack development and data processing. Deeply interested in the applications of Artificial Intelligence and seeking a summer research internship to apply analytical problem-solving skills to data-driven projects. Eager to contribute to research teams by leveraging expertise in Python-based data analysis and scalable web architectures while expanding knowledge in advanced AI methodologies.

Research Interests

- **Data Analytics:** Exploratory data analysis, statistical summarization, and trend visualization using Python (NumPy and Pandas).
- **Applied AI Exploration:** Integration of LLM APIs and automated workflows for professional tools and productivity.
- **System Architecture:** Secure backend systems, API development, and optimized data storage for research applications.

Education

Bachelor of Technology (B.Tech) - Computer Science Engineering SRKR Engineering College, Bhimavaram <i>CGPA: 8.91 / 10.0 (Up to 3rd Semester)</i>	2024 – 2028
Intermediate (Class XII) Sri Chaitanya College, Tuni <i>Percentage: 89.5%</i>	2023 – 2024
Secondary School (Class X) Sri Chaitanya Techno School, Tuni <i>Percentage: 85%</i>	2021 – 2022

Relevant Coursework

- Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems
- Discrete Mathematics, Introduction to Programming, Probability and Statistics, Web Technologies

Technical Skills

- **Programming Languages:** Python (**NumPy, Pandas**), Java, C, JavaScript (ES6+), SQL.
- **Web Technologies:** HTML5, CSS3, Responsive Design, spring, spring Boot
- **Backend & APIs:** REST API, GraphQL, FastAPI, Gemini API.
- **Databases:** MongoDB (NoSQL), MySQL (Relational).
- **Tools & Frameworks:** Git, GitHub, VS Code.

Selected Projects

Intelligent Quiz Management System using AI | *React, FastAPI, Gemini, SQL, Python, Django*
2025

- Led the architectural development of an **AI QUIZ System** for automated resume analysis and assessment.
- Implemented matching logic and data processing pipelines using Python to analyze skill sets and provide role insights.
- Engineered responsive React dashboards to visualize skill gaps and provide analytics based on processed data.

Fake Job Detection (Using AI) | *HTML, CSS, JS, MongoDB, ML, NumPy, Pandas* 2025

- Implemented matching logic and data processing pipelines using Python to analyze skill sets and provide role insights.
- Optimized and authenticational website which detects a fake job letter with intensive data analysis.

Achievements & Honors

- **Infosys Springboard:** Good Performer and Team Lead in Infosys Springboard 2024 Virtual Internship.
- **Academic Excellence:** Consistent Performer in Academics while maintaining a good CGPA of 8.91.
- **Java Full Stack Development:** Completed Java Full Stack Developer Virtual Internship in Eduskills.
